Published documents

Three real documents, published as they are. Each is shown as pages on a desktop and as flow on a phone, with a table of contents whose entries carry page numbers, a link to any paragraph, find in the page, and a PDF that is the same painter.

The security policy is Google's BoringCrypto Android FIPS 140-2 policy, public material. The two NIST documents come from the Cryptographic Module Validation Program and are works of the United States Government.
