The dock

The dock sits at the bottom of the screen. Out of the box it holds the first-party apps, in order: **Launchpad**, **Settings**, **Files**, **Terminal**, **Text Editor**, **Calculator**, **App Store**, **Video Player**.

- **Click** an icon to launch or focus that app.
- A **running app shows an indicator** under its icon.
- **Drag** an icon to reorder the dock.
- **Right-click** an icon for its menu, including **Remove from Dock**.

Installed apps that aren't pinned appear in the dock while they run, and drop off when they close.
